Salter Labs I-Guard™ Valved Aerosol Delivery System (VADS)

For Adult and Pediatric Patients

A combination of Salter Labs Nebulizers coupled with specially designed and constructed masks, to diminish aerosolized medication entering a patient’s eyes.

Features

- Valved Assembly for adult and pediatric patients
- Color coded, directional flow, one way valves and Micro-vented ports
- Integral use with Salter 8900 series Nebulizer or with NebuTech® HDN® Nebulizer
- Mask has integral tapered slip fitting connector
- Lightweight mask and Nebulizer assembly with elastic headstrap
- Soft, clear, curved, feathered edge mask design
- Anatomically shaped, elongated style mask
- Soft aluminum nose clip

Benefits

- A convenient and comfortable medication delivery system
- Helps keep medication away from the eyes
- Reliable cost effective, spill proof Nebulizers simple to operate
- Easy secure connection to Salter 8900 or NebuTech® HDN® Nebulizer
- Convenient for caregiver to position during treatment
- Provides extra comfort and superior seal
- Provides enhanced flow direction of medication delivery
- Enhances eye protection with simple adjustment
Salter I-Guard™ Valved Aerosol Delivery System (VADS)

For Adult and Pediatric Patients

Salter Labs® has assembled a unique Aerosol Delivery System for adult and pediatric patients that incorporates the performance benefits of the 8900 Series and NebuTech® HDN® hand held small volume nebulizers coupled with special masks for an improved aerosol delivery system.

The Salter nebulizer of your choice easily attaches and fits securely to the special design adult or pediatric size mask. The soft, clear Elongated Style masks have been carefully constructed with special micro vented exhalation ports (MVP) to aid in the medication delivery to the patient’s nose and mouth while diminishing incidence of the aerosol inadvertently getting to the patient’s eyes.

A caregiver can readily hand hold or adjust the elastic headstrap fit to ensure optimum treatment effectiveness. The Salter nebulizers’ unique spill proof features allow them to be set aside temporarily without fear of a costly or messy medication spill.

This medication delivery system may be driven by piped wall source gas, compressed gas or the Salter AIRE Plus™ portable treatment compressor...resulting in cost effective, optimum treatment efficiency.
