Conventional
Nasal ETCO₂
Sampling Cannulas
Permits ETCO₂ sampling during spontaneous breathing.

Features
- Anatomically curved to fit upper lip
- Curved, tapered nasal prongs
- Soft, lightweight, clear material
- End tidal sampling from both nares
- Full range of size configurations

Benefits
- Eliminates flap or ridge which can cause irritation
- Improved anatomical fit for long-term use
- Doesn’t interfere with patient observation
- Delivers accurate, quantitative reading
- Available for adult, infant, intermediate infant and pediatric usage
Salter Labs End Tidal Sampling Products

Conventional ETCO₂ Cannulas...
Permits ETCO₂ sampling with the non-intubated patient.
