

LIMITING EXPOSURE AT EVERY STEP

Nonin WristOx²® 3150

Wrist-Worn Pulse Oximeter

Introducing Single-Patient Accessories for the WristOx²® 3150

Preventing infection during a pandemic means you need safety at every step. Nonin single-patient sensors and wrist straps reduce touchpoints to help limit exposure while capturing reliable, accurate patient data. **Safety first. Reliability always.**

*WristOx² 3150 is sold in two configurations based on desired data download/accessibility. The WristOx² 3150 USB support data download through USB connection and the WristOx² 3150 with BLE supports data transmitted via Bluetooth Low Energy.

Single Patient Use, Multiple Infection Prevention Benefits

Reduces spread of infection from patient to patient and patient to clinician

PureLight LEDs eliminate variation in readings for consistency across studies and patients

Maximizes workflow and time-savings by reducing number of components requiring cleaning between studies

Works on all skin pigmentations for quality monitoring across all patient populations

Eliminates need for cleaning accessories and potential variability in cleaning practices and efficacy

Every Nonin sensor is functionally tested for guaranteed quality right out of the box

Designed With Infection Prevention in Mind

Eliminates need for cleaning accessories between use

PureLight LEDs eliminate variation in readings

Short cable length designed for wrist-to-finger fit

Breathable, flexible sensor cloth material

Tamper-proof wristband closure
